- Burglary resistance: Grade 4 according to EN 1143-1, Strong Room
- Door: S95 high-security door
- Alternative size: Available in 10-ft

Secure storage for weapons and ammunition

This custom-built 20-ft High Cube container provides a robust and highly secure solution for the storage of weapons, ammunition and other sensitive equipment.

The container is reinforced with **75 mm Ultra High Performance Concrete (UHPC)** produced by Hi-Con, providing a combination of high structural strength, ballistic protection and fire-resistant properties.

The solution is designed and certified to meet demanding security requirements, including **FB7 ballistic protection in accordance with Annex C of EN 1523**. It is also certified to **Grade 4 according to EN 1143-1** for strong rooms, providing a high level of protection against unauthorised access.

Access to the container is secured by an **S95 high-security door**, completing a solution developed for applications where controlled access and a high level of physical security are essential.

The high-security container is available as a 20-ft High Cube and can also be supplied in a 10-ft version.

Certified protection for sensitive and high-value storage

Beyond weapons and ammunition, the high-security container is suitable for a wide range of applications where valuable, sensitive or security-critical equipment requires enhanced physical protection. This may include technical equipment, confidential materials, high-value assets or other items that must be protected against unauthorised access and external threats.

With its certified construction and robust security features, the container provides a flexible solution for organisations with demanding storage and security requirements.
